

Step One

Brief project meeting

It all starts with the briefing process to ensure we get all the right information. No one likes bill shock so we ensure that we collect all the details to get started.

Quote proposal

Once we've got a full outline of the project we will put together a quote/proposal. Our goal is to be flexible to work with your needs.

Our payment terms

To start your project we will need a 50% deposit. Once we've received this we will get the project underway and give you an estimated date when you will receive proofs of your designs.

Step Two

Design concepts

We love this stage! Solving problems visually gets us excited and we love coming up with a solution that connects you to your customer.

We will create concepts for you based on the information we gathered in our brief project meeting. Depending on your requirements one or a number of concepts may be presented.

Step Three

Alterations

Something does not feel right? No problem. We factor in some alterations to our concepts in our original quote to make sure we get a solution that is the right fit for you and your business.

Whether the colour, font or placement is not what you are after, just let us know and we can make the required alterations.

Any additional alterations over what was in the original quote will be charged at an hourly rate.

Step Four

Finalising Project

Before the final artwork files are released we require final payment. This is any remaining fees or costs associated with the project.

Final Files

Sit back and relax as we provide you with your final files. This way you'll have everything you need on file for any future projects.

If you already have a provider such as a printer we can work with them and supply print ready files.
